

## SOFÁ TIBET

While thinking about Tibet, you imagine a mystical place where thousands of monks are living and meditating. Alexandra David Néel, had this clearly in mind when she reached Tibet in 1926. She was the first women in history to do this. The sofa Tibet is a piece of furniture to discover. Warm, but at the same time really fresh, it contains characteristically lines and a delicate finish. A mix that results in a comfortable and cozy product. The Parisian exploratory celebrated 100 years. We don't know if the Tibet couch could endure that long, but what we know for sure is that once you try him, it would be difficult to live without him.
